
COLETAC SUPPRESSOR COVER

➤ **Suppressor Cover Withstands The Heat Of Sustained Fire** The newest cover from Cole-TAC, the High Temperature Python (HTP). The outer shell is rated to 980°C and the inner tube is 1650°C. This cover will not slip or shift around on your can. Don't get burned again.

➤ **Suppressor Cover Withstands The Heat Of Sustained Fire**

When shooting at long ranges, every little detail becomes critical. The further out you go, the more those details can make or break your shot. Ensuring you have a clear sight picture can be one of the most important. If you cannot see your target, you cannot shoot it. As you begin to shoot, your suppressor gathers a lot of heat. This heat begins to rise off of the suppressor and creates a mirage. This mirage can obstruct your view making it almost impossible to see the target. Our HTP Suppressor Cover is made to mitigate that mirage coming off of the suppressor.

Another great use is on rapid fire guns and you transition from rifle to pistol. If you have done it enough, you probably have a scar on your leg where the can fell. Don't let it burn you again. Cover that can up.

Only from Cole-TAC can you get the leading suppressor cover retention system. Using our unique BOA locking straps, your cover is secured to your suppressor ensuring it stays in place while shooting. Other covers out there loosen up over time and begin to slide off. When you are on target, the last thing you need is to look up at your cover. We have done extensive testing and found that the BOA system keeps the cover in place round after round. Other great benefits of the BOA straps include allowing f...
