
ENTANGLE SECURE COMMUNICATION SYSTEM

- Globally scalable secure communication system that is applicable for government, military, business, and individual use.

- Entangle has developed a unique secure communication system - Entangle device in combination with your smartphone creates a high security encrypted communication channel to share your confidential and private information via text messages. It is a globally scalable secure communication system that is applicable for military, government, business, and individual use.

Existing communication solutions, e.g. smartphones and communication apps, have many security vulnerabilities – sensitive strategic, financial, and private information can potentially be obtained by a third party (adversaries, criminals, competitors) and cause immense losses.

We have taken One Time Pad (OTP) – the only truly secure encryption technique in the world and implemented it in a way that is usable in combination with existing communications infrastructure, and designed the Entangle Secure Messaging System with state of the art features:

- Unbreakable encryption technique: One Time Pad – mathematically proven unbreakable.
- Unpredictable encryption keys generated by a built in Hardware TRNG Generator.
- Inaccessible from outside world device has no Wi Fi, Blu...
