
PENGUIN C MIL MK2

- Penguin C Mk2 MIL is a long-endurance, long-range unmanned aircraft system designed for demanding operations. Its endurance of up to 25 h (payload dependent) and with a line-of-sight range of 180 km makes it a competent unmanned platform that meets various mission needs.

- The system is an upgraded Penguin C Mk1 system, which is in production from 2015. In 2020 original Penguin C aircraft went through an upgrade program and received a designation Mk2.

The upgraded aircraft has significantly extended flight endurance, longer radio link range and larger payload capacity. [The Penguin C Mk2](#) MTOW is under the 25kg in Group 2 configuration and 28kg in Group 3 configuration. The aircraft is non-ITAR restricted, giving our global customers easy access to its capabilities.

The aircraft is designed for operation from unprepared sites, launched by a portable pneumatic catapult. Landing is achieved using a parachute recovery system. Penguin C Mk 2 UAS is designed to be operated by a crew of two people composed of a technician and an operator. The Penguin C Mk2 fixed-wing, UAS provides best-in-class performance, endurance, and cost-effectiveness for a fixed-wing...
