## POWER SUPPLY UNIT 230VAC / 27 VDC 600W

Power supply unit 230VAC / 27 VDC 600W is designed to provide the 27 VDC power supply for military radios or other equipment that requires a 27 VDC power supply.

- > Power supply unit 230VAC / 27 VDC 600W is designed to provide the 27 VDC power supply for military radios or other equipment that requires a 27 VDC power supply.
  - Input voltage 50...260 VAC (output power is reduced at an input voltage lower than 200VAC);
  - Energy conversion efficiency 86...90%;
  - Output voltage 27.6V +/- 0.1%
  - Output voltage noises and pulses <30 mVrms;
  - Maximum load current 30A;
  - Ambient temperature from -25 to +40 degC (at temperature +40...+70 degC the output power is reduced);
  - Output "-" is connected to housing;
  - Compliance with EN60335-2-29+A2 Electrical Safety Standard and EN55022B, EN50081-1, EN50082-2 Electromagnetic Radiation Standards.
