
DE-TECTOR FLEX

- Designed to detect traces of explosives and drugs on surfaces of objects and parts of the body, DE-tector flex is able to detect and identify substances that are measured in some nanograms. Is widely used at airports for screening passengers and cargo, customs checkpoints and other strategically important objects.

Technology - Ion Mobility Spectroscopy (IMS);

Intuitively understandable and simple user interface;

Non-radioactive ionisation source;

Automatic calibration/verification;

"Hot" interchangeable batteries;

Battery life - 2 hours;

M...
