FLASHEYE - SURVEILLANCE TECHNOLOGY
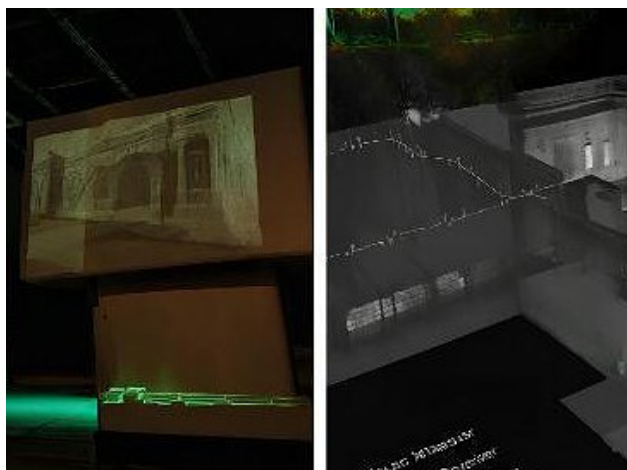

> **Advantages:Precise event detection and reduced false alarms;Security in diverse environments – Acuity is suitable for outdoor and industrial use,where conditions are often challenging, such as dust, rain, or poor visibility.Adaptive usage – It can be customized for various surveillance and security needs,including perimeter protection, logistics flow management, or industrial processmonitoring;Integration with existing security systems;Automat...**

> The Flasheye product "Acuity" is an innovative surveillance and security technology that utilizes lidar (Light Detection and Ranging) for precise detection and tracking of events and objects. Lidar uses laser pulses to measure distances and create detailed 3D images or maps of the surrounding environment. The lidar system emits thousands of laser pulses per second and measures the time they take to return from objects, enabling the creation of highly accurate images of the area or precise object tracking.
