# FORESTRADAR

❯ **Our unique ForestRadar Change detection technology uses a combination of Synthetic Apperture Radar (SAR) satellite data, multispectral optical satellite imagery and Machine Learning (ML) algorithms to precisely detect new clear-cut, fire-burnt and wind-fall areas in forests.**

ForestRadar

❯ Our unique ForestRadar Change detection technology uses a combination of Synthetic Apperture Radar (SAR) satellite data, multispectral optical satellite imagery and Machine Learning (ML) algorithms to precisely detect new clear-cut, fire-burnt and wind-fall areas in forests.

ForestRadar Change detection advantages:

• Detects clear-cuts, wind-falls, fire burnt areas
• Weekly change alerts (SMS, WhatsApp, e-mail)
• Small detection areas – starting from 0.25 ha
• Very high accuracy – 95%
• Result polygons delivered in any vector format
• Validated technology and accuracy

Please, request demo service by writing to info@forestradar.com
