
NAVTECH RADAR

➤ Navtech radar systems are used for detecting, tracking, and analyzing movement over large areas, providing continuous monitoring regardless of weather or visibility conditions. Navtech radars utilize FMCW (Frequency Modulated Continuous Wave) technology, which enables precise measurement of distance and movement. These radar systems are designed to operate in extreme conditions and offer continuous surveillance over vast areas.

➤ Navtech radars utilize FMCW technology, which enables precise measurement of distance and movement. These radar systems are designed to operate in extreme conditions and offer continuous surveillance over vast areas.

- 360-Degree Coverage;
- Long Range Operation;
- Continuous Operation in All Conditions.

Advantages:

- High Accuracy and Resolution;
- Operation in Poor Weather and Visibility;
- Wide Coverage and Scalability;
- Integrability with Other Systems.

Applications:

- Border and Perimeter Security...
