
OCTORIG TACTICAL

➤ Functional training rig for physical conditioning and fitness, that allows setting up the obstacle course for personnel. This rig will perfectly fit for competitions, circle training, creation of various obstacles or training in groups up to 40 people.

➤ This model has been created based on OctoRig octagon and frame for training on the obstacle course. This frame will perfectly fit for competitions, circle training, creation of various obstacles or training in groups to 40 people.

The frame includes 12 places for safe work with a bar (weight), 20 horizontal bars, 2 elongated monkey bars, ending with slope steps (Flying pull-up bars). Central parts of monkey bars are located angularly. In the internal area of the frame, many horizontal bars and beams are available that allow arranging an additional training area using ropes, boxing bags, beams, platforms, and TRX systems.

Bars are made of 80 80 mm steel profile pipe. Metal thickness is 3 mm. The structure is very stable and strong, but it needs fastenings to the floor or to special platforms. The height of bars maybe 2.4 or 2.8 meters. Bars are equipped with holes for fastening of additional elements and attached implements. All holes have equal size and are located at all height from all parts, thus providing the widest modific...
