
WATEX MOBILE CONTAINER WATER FILTRATION SYSTEM

➤ The water treatment system, which is intended to be transported with a heavy truck SCANIA 112, can be loaded using a "Hooklift system". The WATEX mobile container water filtration system is one of the best options for surface water treatment in case of a crisis. The water treatment equipment can provide drinking water with capacity of up to 5 m³/h. The water treatment equipment is widely used in temporary military and civilian camps, as well ...

➤ **Application:**

The system is designed for use in a field kitchen. Container equipment provides the entire water supply cycle - extraction from the source, treatment, storage and supply to the consumers.

Transportation of the equipment:

The water treatment system is intended to be transported with a heavy truck SCANIA 112 and can be loaded using a "Hooklift system".

Water reservoir equipment:

- Stainless steel AISI304 water reservoir with a nominal capacity of 10,000 liters;
- The water treatment system is designed for operation in ambient temperature ranging from -20 ° to +40 °...
